

Efficient, Elegant, Easy: The blueprint for a beautiful conversion.

Converting a commercial property into residential apartments?

We know you want for your money—more of it. Our advanced HVAC solutions are designed to deliver maximum ROI with minimal infrastructure changes.

Time is money. Efficiency is everything.

With conversions, every second counts. Ice Air systems are engineered for easy installation and maintenance. **All Electric, All Climate Comfort™** technology delivers heating and cooling with **up to 25% greater efficiency** and zero emissions. The cost of plumbing to supply hot water for heat is eliminated.

With our knowledge and experience, Ice Air can navigate building code restrictions and the path to incentive programs.

Aesthetics matter. So do options.

Our systems will be enhancing the aesthetic appeal of your architectural vision. Ice Air provides the perfect balance of form and function. **With more cost-effective options**, Ice Air can deliver the right solution for any type of building, climate, or power source. Unlike traditional manufacturers, we can also modify equipment for difficult projects. Ice Air is the one source for parts, replacements and retrofits that really fit perfectly.

Make Ice Air All Climate Comfort™ part of your plans.
